

## BNH GiftAway 2024 is now ready to deliver “Quality to Value” through Complete Care with health check-up packages tailored to your needs

Check your health at every stage, prevent and reduce the risk of serious diseases, take care of yourself and your loved ones.

- **Must Do** - Recommended preventive health check-ups by age that should be screened for abnormalities that may be detected early without symptoms. Early detection will allow treatment to begin early, reduce the severity of the disease, and make treatment easier when the disease is in an advanced stage.
- **Smart to Do** - Health check-ups packages to promote good health to be even better, meet your desired lifestyle, and focus for diseases that often come with lifestyle behaviors. Or appropriate testing for certain disease symptom groups.
- **Dynamic to Do** - A list of preventive health screenings recommended for those who are concerned or suspect that they may have a disease, or even if they do not have symptoms, they can be screened for preventive care.
- **Next Do** - A recommended health screening for individuals with symptoms or those who suspect they may have a disease. Personalised long-term health check-up planning for the following year, conducted by a team of expert physicians from BNH Hospital.
